EDUCATION

University of Oregon, Eugene
Bachelors of Science
Department of Computer Science

August 2014 - December 2019

CURRENT STATUS

With a Bachelor's of Science in Computer Science and years of experience in customer-relation based positions, I have a wide variety of experience. A break from Computer Science after university has allowed me to bring stability and balance into my life and now with renewed vigor I can continue my studies. Motivated to learn new skills and continue growing myself and my community. Versed in friendly team-oriented service and looking for an environment that will teach new trades or take advantage of my developed skill set.

WEB DEVELOPMENT

fclogworks.com

February 2020 - June 2020

Online gallery and business homepage for Forestcraft Logworks. A Central Oregon based general contracting company. Focused on a gallery displaying the exemplary work of ForestCraft featuring modern css light boxing and interactions.

hyeiderconstruction.com

August 2021 - Present

Business homepage for a start-up construction company Harris-Yeider Construction. Primarily a resource to display previous jobs and client testimonials along with a web form for client information.

PERSONAL PORTFOLIO

DigiMeet

node, ruby on rails, react, typescript, html, css

A webapp to facilitate digital relationships. Built using a modern tech stack and MVC based architecture, DigiMeet is designed for a friendly and interactive user experience.

Language Games

pywebio, sklearn, bokeh, python

A collaborative project designed to express a relational word neural network in fun, interactive ways. My primary task is to restructure the code into an intuitive architecture that will promote and enable new collaborators to join the effort.

TECHNICAL STRENGTHS

Scripting	HTML, CSS, Bash
Programming	Python, C++, C, Java, JavaScript
Technologies	Microsoft suite, Linux OS, Git, AWS
